PROFESSIONAL SUMMARY

Data analyst with a B.S in Statistics from the University of Central Florida with both basic and advanced certifications in SAS, proficiency with R and newly acquired skills in Python, Javascript, and SQL. Proven analytical proclivity with years of experience processing and projecting sales data for private business. Particular inclination for times series data analysis and the capacity to format poorly structured data into pliable and distributive forms. Driven desire and intuition to leave no possible area of a given data set hidden. Flourishes in environments where analytical skills can be applied, and further knowledge can be acquired.
